
December 1, 2020 Apodaca: Anderton Castings Mexico is pleased to announce the opening of a new machining plant.

To better answer our customers' growing demand, we are expanding the capacity of Anderton Castings, Mexico with a new machining plant conveniently located 5 minutes from our current facility in Apodaca.

All existing machining centers are expected to move from our current facility to the new machining plant in January. The plant will have its own quality lab including metrology and machining, quality, maintenance, and engineering personnel.

This additional plant will free up space to install additional aluminum high pressure die casting and CNC machines to meet volume increases and needs for new awarded programs launching in 2021 and beyond.
